CSABAcast is a TIER-1 direct automotive supplier, their customers include European, primarily German car companies, e.g. Audi, BMW, Mercedes, VW and Ford. They also supply products to other sectors to Bosch, MIELE and ThyssenKrupp among others. In 2017, the Budapest Stock Exchange selected CSABAcast as one of the 50 most inspiring Hungarian companies, and the London Stock Exchange listed it as one of the 1,000 most inspiring and most dynamic European small and medium-sized enterprises.

As a result of regular capacity development over the last decade, the aluminium foundry in Hungary now employs hundreds of workers and delivers about 10 million gears, engines and other components per year. The company's success relies on several factors connected to automation: constant communication with partners, design, production and delivery based on real-time information, quick response to all customer needs from quotes and consultation to manufacturing.

Our team have designed the company's business communication processes, and we maintain the system since 2015. The WST Group has developed the integrated software solution, which operates with 4,000 EAI transactions daily.
