SPECIALTY • B2B | EDI

[CHECK OUT SIMILAR PROJECTS](#)

With factories in Austria and Hungary, the Rejlek Group manufactures 10,000 different products per year: injection moulds, stamping dies, plastic components, and metal parts. The latest manufacturing technologies serve their customers with assemblies and final goods for the automotive, medical and engineering industries among others.

To stay at the top of the industry in the region, the company's systems must evolve constantly. Since time is key for Rejlek, we developed automated workflows from manufacturing to logistics. The management and the teams at all locations can handle operations, monitoring and business communication with partners in a single system.

Customized EDI support provides the uninterrupted connection of more than 600 machines and 900 people, who create, produce, check and control. Machines, tools and processes were created by the Rejlek team, that produce of over 300 Million pieces annually.
