Szarvas has become a key word, a symbol and an unmistakable concept for Eastern-European, and especially for Hungarian, Jewry. The alumni are the vanguard for a Jewish culture in Europe and beyond. The program focuses on new generations of leaders who will be capable of taking on tomorrow's challenges and shaping the future of Jewish life.

Participants are teens between 15 and 18 years old, who are coming from various (mostly Central-Eastern European) countries. The registration starts in January and it is a must to provide a seamless and very fast connection for the families who que for available places. The traffic is amazing every year: the number of visitors at reg.szarvas.camp are usually around 25,000 daily, and the places are usually booked within an hour.

The WST team redesigned and built the szarvas.camp website (CMS, newsletter) in 2018. We have developed, and our team operates, the customized reg.szarvas.camp participant registration software and CRM database.
