Sziget group has been a WST group client
since 1997, and the kick-off every year
brings challenging tasks. Our collaboration
focuses on innovative solutions to support
the organizer and to guarantee the best
user experience for hundreds of thousands
of visitors from Europe and beyond.

The week-long festival has grown from a
relatively low-profile student event to
become a prominent European rock
festival, with about 50% of all visitors
coming from outside Hungary. The sales
start a year in advance and the site has an
average 10.000-100.000 visits per week
from May to August, when the week of the
festival the highest traffic is around
150.000 a day during the week of the
festival..

As one of the most known brands in
Hungary it is very important for them to
have a very easy to use CMS and a fast
and high availability website.
